

HASEEB UR REHMAN

FULL STACK WEB DEVELOPER

+92 319 7810023 | haseebrehman3460@gmail.com | linkedin.com/in/haseebrehmanweb | github.com/HasebRehman

PROFESSIONAL SUMMARY

Results-driven Full Stack Web Developer with solid hands-on experience building and shipping scalable, high-performance web applications using modern JavaScript and TypeScript ecosystems. Skilled in architecting complete solutions — from React and Next.js frontends to NestJS/Express backends and PostgreSQL/Supabase databases. Currently contributing to live production platforms at Cure Logics. Graduated with a strong 3.63 CGPA from NUML University (14th February 2026) and passionate about clean code, performance, and continuous growth.

TECHNICAL SKILLS

FRONTEND

React.js, Next.js, TypeScript, JavaScript (ES6+)

DATABASE

PostgreSQL, Supabase, MongoDB

TOOLS

Git, GitHub, VS Code, Vercel

BACKEND

NestJS, Express.js, Node.js, REST API's, JWT Auth

STYLING

Tailwind CSS, Material UI, HTML5, CSS3, Responsive Design

AI TOOLS

Codex, Claude, Antigravity, Kiro, Cursor

WORK EXPERIENCE

Junior Web Developer · Cure Logics

02 FEB 2026 – Present

- Building and shipping full-stack features end-to-end with React.js, Next.js, and NestJS inside a fast-paced production environment, working closely with senior engineers to meet release deadlines.
- Designing and integrating RESTful APIs against PostgreSQL and Supabase, cutting query response times and strengthening data reliability across core modules.
- Refactoring frontend and backend code into type-safe TypeScript, and applying lazy loading and code splitting to noticeably speed up page load times.
- Using AI-assisted development tools including Claude, Cursor, and Codex for faster debugging, code reviews, and technical documentation, keeping sprint output ahead of schedule.

KEY PROJECTS

Lizt — Smart Event & Task Organiser — JavaScript · Supabase

- Engineered a full-featured collaborative event management web app (lizt.app) with real-time task checklists, cost tracking, shared file storage, team messaging, and per-event participant management.
- Leveraged Supabase for real-time database sync, authentication, and file storage; built a responsive mobile-first UI ensuring seamless multi-user collaboration and live updates across all devices.

Veylohr — HR Management Platform — React · TypeScript · Express · PostgreSQL

- Contributed to veylohr.com, a production HR SaaS platform covering employee records, attendance tracking, payroll workflows, onboarding flows, and granular role-based access control.
- Built REST API modules and designed normalised PostgreSQL schemas for complex workforce data; implemented JWT authentication, admin dashboards, and automated HR reporting features.

E-Commerce Platform — Next.js · TypeScript · Supabase · Nest.js

- Architected a full-stack e-commerce application with product catalog, cart management, and a complete secure checkout flow; used Supabase for real-time inventory sync and user authentication.
- Designed normalised PostgreSQL schemas for products, orders, and user data; integrated role-based admin panel for product and order management with a clean, responsive storefront UI.

EDUCATION

National University of Modern Languages (NUML), Lahore

2022 – February 2026

Bachelor of Science in Computer Science | CGPA: 3.63 / 4.00
